PROFESSIONAL SUMMARY

Dedicated Computer Science student with strong foundation in system design, algorithms, and data structures. Excellent leadership abilities and commendable communication skills, effectively translating technical knowledge into actionable strategies

EDUCATION

Faculty of Computer Science, Higher School of Economics

2021-2025

Relevant Coursework: Algorithms & Data Structures, Software Design, Linear algebra, mathematical analysis, Calculus, Theory of Probability and Mathematical Statistics

SKILLS

Programming languages Python, C++, C, Java, C#

Frameworks/Tools Flask, Fastapi, Postgresql, SQL, SQLAlchemy, Docker, Linux, Git, Bash

EXPERIENCE

Backend Developer

Nov 2022 - Dec 2022

NTV

Moscow

- Developed moderator-bot for NTV channel in telegram.
- Containerized project using Docker.
- Developed a website for editors to facilitate bot configuration.

Backend Developer

Jul 2022 - Aug 2022

NTV

Москва

- Developed a skill for Yandex Alice.

PROJECTS

Hangout bot. Created a bot for finding the nearest recreational venues based on user's budget and preferences, utilizing the Yandex Maps API for geolocation interaction and PostgreSQL for database management. ([github](#))

HealthApp Habits Tracker. Initiated a team-based term project, which is an assistant designed to track the completion of habits and tasks for users. As the technical lead, I have made the API that interacts with the Telegram bot and website. ([github](#))

LANGUAGES

Russian - Native

English - B2 (Upper-Intermediate)
